

Masonite Wood Door Product Update

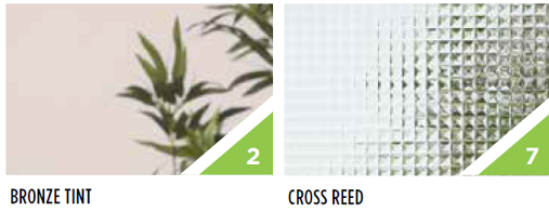

November 16, 2021

Dear Valued BWI Distribution Customer,

At BWI, we value your partnership and are committed to providing you with quality services and products. Like many of you, we continue to face supply chain challenges in getting a reliable flow of components to meet the robust demand environment. This has recently influenced two changes to our Masonite Wood Door product line including Torrefied Mahogany, and two glass families - Bronze Tint and Cross Reed.

• **BRONZE TINT & CROSS REED GLASS** •

These two glass families are discontinued effective immediately. Over the next several months, these two glass families will begin to phase out from any Masonite and BWI collateral and digital platforms.

BRONZE TINT

CROSS REED

• **TORREFIED MAHOGANY** •

Also, due to lumber supplier delays please be advised that we will need to put a temporary **19-week lead time on our Torrefied Mahogany species for DuraStyle Exterior Wood Doors**. If timing of a project cannot support the 19 week lead time, it is recommended that an alternate species be considered such as Torrefied Maple, Torrefied Fir, or standard Mahogany.

Thank you for your attention and patience as we work through these changes. We value your business and remain committed to our mutual success.

Sincerely,

A handwritten signature in black ink, appearing to read "Aaron Mathews".
